SUMMARY

Full stack Software Engineer with 2 years of industry programming experience and an Applied Baccalaureate in Computer Science. I'm a quick learner and want to make myself as useful as possible to future employers. I admire teachers and mentors and tutored for a year, myself, during University. My number one priority is my family and I will do anything to support my wife and soon to be born daughter. I want to serve and deliver anybody willing to not overlook me and treat me with respect. I will not disappoint and I hope to meet you soon.

PROFESSIONAL EXPERIENCE

Closets by Design – Garden Grove, CA
Software Engineer

Jan 2021–Present

- Developed a ground-up full stack website that was designed after a massive 20-year-old VB6 application. Using: Node.js Vue, DevExtreme, Amazon S3 REST API, Wasabi, SQL Server 2019, MSSQL-npm and Typescript
- Refactored a storage blob backup program back to working order. Using: Visual Studio, Azure Storage w/Tagging & Metadata, AzureStorageExplorer, and NAS.
- All projects managed, backed up and properly branched via Github.
- Designed a franchise monitoring system that gives a live feed of our 60 servers and their connection status. Using: VUE and MSSQL-npm
- Built a back-end script system utilizing Constant Contact's V3 API with the OAuth2-ACFlow to continually manage over 1-million contacts by unsubscribing them from mailing services, following up on select customers expanding our reach.

Mid-Willamette Valley Community Action Agency – Salem, OR
Software Engineer

Jul 2019–Oct 2019

- Developed a credit planner web-application to increase productivity and efficiency for student-teacher credit calculation and graduation path projection Using: PowerApps, and MS Flows
- Fulfilled IT-related tasks including server monitoring, preparing network sites using Spiceworks' ticketing system, managing NAS files and helping with VPN connection set-up
